The Highland Stone® retaining wall systems combine strength with artistic beauty. Crafted with a beautiful rough-hewn appearance, these systems create inviting outdoor spaces. Use of Highland Stone units creates stunning retaining and freestanding walls.
Benefits of Highland Stone® Multipiece:

- Available in three face lengths
- Can be used for straight or curved walls
- Freestanding walls can be built up to 3 feet high, including buried course, but excluding the cap
- Gravity walls can be built up to 4 feet, 6 inches high, including buried course, but excluding the cap
- Taller walls can be built using geosynthetic reinforcement or the Anchorplex™ retaining wall system when designed by a qualified engineer
- Rear-lip block makes installation fast and accurate

Benefits by the numbers:

Freestanding Walls

- Minimum outside radius, measured on the top course to the front of the units: 3 feet, 9 inches*
- Minimum inside radius, measured on the base course to the front of the units: 3 feet, 9 inches*
- Maximum straight-wall length between design elements: 10 feet

Retaining Walls

- Setback/System batter: 1⅛/10.6º
- Minimum outside radius, measured on the top course to the front of the units: 4 feet
- Minimum inside radius, measured on the base course to the front of the units: 8 feet

*Based on installation pattern: large, medium and small units

**Product dimensions are height by face length by depth. Actual dimensions may vary from these approximate values due to variations in manufacturing processes. Contact your Belgard representative for details.
