Retaining Wall System

Renowned for its rough-hewn face and earthen tones, the Diamond Pro Stone Cut® retaining wall system imparts a rich, faceted appearance not commonly found in commercial retaining walls. The performance characteristics make it the proven solution for tall walls, Department of Transportation projects, commercial developments, water applications and other critical wall needs.
Benefits of Diamond Pro Stone Cut®:

- Rear-lip block makes installation fast and accurate
- One square foot of wall face per block
- Gravity walls can be built up to 4 feet high, including buried course, but excluding the cap*
- Taller walls can be built using geosynthetic reinforcement or the Anchorplex™ retaining wall system when designed by a qualified engineer
- ICC evaluated

Benefits by the numbers:

- Minimum outside radius, measured on the top course to the front of the units: 4 feet
- Minimum inside radius, measured on the base course to the front of the units: 7 feet
- Setback/System Batter: 1”/7.1°

Approximate Dimensions (HxLxD)**

Block
8” x 18” x 12”

Cap
Front: 4” x 17¼” x 10⅜”
Back: 4” x 12” x 10⅜”

Corner
8” x 18” x 9”

*This height assumes cores are filled with drainage aggregate, level backfill and clean, compacted sand or gravel and no surcharge.

**Product dimensions are height by face length by depth. Actual dimensions may vary from these approximate values due to variations in manufacturing processes. Contact your Belgard representative for details.
