PAVER APPLICATIONS

Pedestrian

Designated for areas that are primarily for pedestrian applications including commercial plazas that may require occasional access for emergency or maintenance vehicles, as well as residential driveways.

Light Vehicles

Designated for commercial vehicular areas, access ways, and parking lots where only cars and light trucks are anticipated. Heavy vehicles should have limited access and use.

Occasional Heavy Vehicles

Designated for vehicular areas, parking lots, and roadways where limited heavy vehicles are anticipated daily such as large delivery trucks or garbage trucks.

Frequent Heavy Vehicles

Designated for vehicular areas, parking lots, and roadways where heavy vehicles are a regular component of the daily traffic volume.

DIMENSIONS 3 X 12

Paver application icons are general recommendations. Site conditions and pavement cross section must be considered. Paver application icons are based on placement over unbound aggregates for setting beds, base and subbase.

BELGARD PAVER COLORS & FINISHES

SMOOTH SHOT BLAST GROUND FACE

Belgard Commercial allows you to customize your project with optional finishes: Smooth, Shot Blast and Ground face. Contact your Belgard Commercial Representative for more information.

Contact your Belgard Representative for custom finish options and sample products, as well as ADA Compliant products.

Interlocking pavers can be used for a variety of different vehicular applications. Appropriate shape and thickness is based on project-specific conditions including type of loading, base design, and subgrade conditions. It is recommended that you consult a Belgard representative in your area before specifying products for vehicular applications.

Secondary processes and finishes including, but not limited to, face-grind and shot blast, may impact dimensional tolerances from base dimensions.

* May be Suitable for ADA applications. Always evaluate site-specific uses to ensure surface suitability. Product installation and surface maintenance influence compliance with ADA Standards for Accessible Design Section 302 Floors or Ground Surfaces. Tumbling or antiquing pavers can also create surface or edges that may make the product unsuitable for ADA applications.

RESISTANT TO FREEZE THAW
 Freeze thaw resistant—100% frost-free and properties remain unaltered at temperatures ranging from -51.1° to + 60° C (-60°F to +140°F).

RESISTANT TO BREAKAGE
 Because every slab can withstand loads of over 2200 lbs.

RESISTANT TO CHEMICAL AGGRESSION
 Because our pavers are unaffected by alkalis, acids, chemical agents, salt and other de-icing materials.

RESISTANT TO STAINS
 Because a high density and ultra-low absorption rate creates a tight paver surface, it fends off surface mold, moss, dirt and other types of stains.

EASY TO LAY
 Because of superior accuracy in dimensional sizing and linear sides, the pavers allow for perfectly executed installations with tight and accurate lines.

EASY TO CLEAN
 Because it can be cleaned with normal household cleaners and even pressure washed with a **low pressure** washing device.**

EASY TO REMOVE
 Because a 24" x 24" slab weighs just 37 lbs., its light weight permits easy removal, serviceability and even reusability. (Excluding adhered installations).

EASY FOR YOU
 Because the structured top textures formed on the surface of our pavers create slip resistant surfaces.

ROOFTOP PAVERS & PEDESTALS

Possibilities are endless when designing and building plaza decks using Belgard Commercial Pedestals. The pedestal system’s elevation range of 1/8" - 36" allows for building plaza decks over almost any sloping or difficult surface.

Building plaza decks over occupied space has never been easier. The unique screw-to-adjust feature eliminates tedious and time-consuming installation often associated with constructing level decks over sloping surfaces. Construction crews quickly level each plaza paver by adjusting pedestal height, even while loaded.

Future access to waterproofing entails simply removing specific plaza pavers. Pedestal adjustments within the allowed range are accomplished by merely adjusting pedestal height and you're done – saving time and money.

SPECIFICATIONS

- Supports up to 1000 lbs.
- Maximum elevation up to 36" using couplers and braces
- Impervious to water, mold & freeze-thaw
- Preassembled
- Packaged in weather-resistant boxes
- Contains 20% post-industrial recycled material
- Engagement "bumps" warn of over-extension

CUBE COLORS

NOTICE: Colors subject to change without prior notice. Colors in this brochure may vary from current stock. Actual samples are available from Belgard Commercial. Slight variations in color may occur during manufacturing. Slight scuffing may occur during handling.

PROFESSIONAL SUPPORT

ENVIRONMENTAL SOLUTIONS

Belgard consultants can work with your team to develop the best PICP system design or retaining wall configuration to control runoff volume and discharge rates, improve the quality of local groundwater, reduce or prevent downstream impacts, and minimize the land consumed for stormwater management.

CAD FILES

For your convenience, Belgard offers a constantly expanding library of easy-to-download CAD files of our products and patterns.

CONTINUING EDUCATION

Belgard offers a variety of ongoing educational programs for our industry partners, including Lunch & Learns, online CEU courses, and our Belgard University training program.

SITE PLANNING

The experts at Belgard can help you optimize your site in a number of ways—whether you’re looking for creative ways to define public spaces, manage or harvest stormwater, or increase the useable space for development.

ENGINEERING SERVICES

Our team of design consultants can help address both aesthetic and engineering design concerns, material quantity estimates and permit ready plans.
