BELGARD
COMMERCIAL

Paver Applications

Pedestrian

Designated for areas that are primarily for pedestrian applications including commercial plazas that may require occasional access for emergency or maintenance vehicles, as well as residential driveways.

Light Vehicles

Designated for commercial vehicular areas, access ways, and parking lots where only cars and light trucks are anticipated. Heavy vehicles should have limited access and use.

Occasional Heavy Vehicles

Designated for vehicular areas, parking lots, and roadways where limited heavy vehicles are anticipated daily such as large delivery trucks or garbage trucks.

Frequent Heavy Vehicles

Designated for vehicular areas, parking lots, and roadways where heavy vehicles are a regular component of the daily traffic volume.
Paver application icons are general recommendations. Site conditions and pavement cross section must be considered. Paver application icons are based on placement over unbound aggregates for setting beds, base and subbase.

GEOMETRIC SHAPES

MODULINE SERIES 4 X 12

* May be Suitable for ADA applications. Always evaluate site-specific uses to ensure surface suitability. Product installation and surface maintenance influence compliance with ADA Standards for Accessible Design Section 302 Floors or Ground Surfaces. Tumbling or antiquing pavers can also create surface or edges that may make the product unsuitable for ADA applications.

Note: The Moduline & Dimensions Series is all made to order. Lead times will apply. Check with your local Belgard representative for applicable lead times.

Interlocking pavers can be used for a variety of different vehicular applications. Appropriate shape and thickness is based on project-specific conditions including type of loading, base design, and subgrade conditions. It is recommended that you consult a Belgard representative in your area before specifying products for vehicular applications.

Secondary processes and finishes including, but not limited to, face-grinding, may impact dimensional tolerances from base dimensions.

If installing on elevated surface over ¾" all porcelain must have a factory applied fiber mesh backing.

Spacers are required for all porcelain paver installations. For vehicular applications, there must be a mortar install over a concrete slab. Visit Belgard.com/porcelain for additional installation details.

Rooftop Pavers & Pedestals

Possibilities are endless when designing and building pedestal decks using Belgard Commercial Pedestals. The pedestal system's elevation range of ⅛" - 36" allows for building plaza decks over almost any sloping or difficult surface.

Building pedestal decks over occupied space has never been easier. The unique screw-to-adjust feature eliminates tedious and time-consuming installation often associated with constructing level decks over sloping surfaces. Construction crews quickly level each pedestal paver by adjusting pedestal height, even while loaded.

Future access to waterproofing entails simply removing specific pedestal pavers. Pedestal adjustments within the allowed range are accomplished by merely adjusting pedestal height and you're done – saving time and money.

SPECIFICATIONS

- Supports up to 1000 lbs.
- Maximum elevation up to 36" using couplers and braces
- Impervious to water, mold & freeze-thaw
- Preassembled
- Packaged in weather-resistant boxes
- Contains 20% post-industrial recycled material
- Engagement "bumps" warn of over-extension

Landings™ Step Unit	6" x 48" x 18"	–	6	2,565
Marina™ Coping	6 x 12 x 2⅜"	63	126	1,764
Melville™ Curb	4" x 24" x 6½"	96	48	2,449
Moduline Truncated Dome	12" x 12" x 2⅜"	–	120	3,338

The textures on sides 1 and 2 are designed to nest with minimal gapping between the units.

Place units so they nest tightly together.

LANDINGS STEP UNIT

Professional Support

ENVIRONMENTAL SOLUTIONS

Belgard consultants can work with your team to develop the best PICP system design or retaining wall configuration to control runoff volume and discharge rates, improve the quality of local groundwater, reduce or prevent downstream impacts, and minimize the land consumed for stormwater management.

SITE PLANNING

The experts at Belgard can help you optimize your site in a number of ways—whether you're looking for creative ways to define public spaces, manage or harvest stormwater, or increase the useable space for development.

ENGINEERING SERVICES

Our team of design consultants can help address both aesthetic and engineering design concerns, material quantity estimates and permit ready plans.

CAD FILES

For your convenience, Belgard offers a constantly expanding library of easy-to-download CAD files of our products and patterns.

CONTINUING EDUCATION

Belgard offers a variety of ongoing educational programs for our industry partners, including Lunch & Learns, online CEU courses, and our Belgard University training program.
