### ✓ FEATURES & BENEFITS

- High density and ultra-low absorption rate creates a tight surface texture and fends off surface mold, moss, dirt and other types of stains
- Faster installation with modular porcelain products
- Unaffected by alkalis, acids, chemical agents, salt and other de-icing materials
- Can be cleaned with normal household cleaners and even pressure washed with a low pressure washing device\*
- Structured top textures create non-slip surfaces
- Freeze thaw resistant—100% frost-free and properties remain unaltered at temperatures ranging from -51.1° to + 60°C (-60°F to +140°F)

*\*It is important that all pressure washing of your porcelain pavers be done with a low pressure washer with a maximum of 1600 psi and nothing more powerful. When pressure washing your installation, care should be taken to prevent damage to the grout (adhesive and grout installations) and some re-sanding will be necessary when power washing an installation with sand or polymeric sand joints.*
