

DIAMOND PRO® HOLD

RETAINING WALL

A NEAR-VERTICAL WALL DESIGNED
TO MEET CONNECTION
REQUIREMENTS FOR ACTIVE
SEISMIC REGIONS

FEATURES & BENEFITS

- Front channel can accept up to 3/4" pipe to create a mechanical grid connection while maintaining a radius.
- Lug locators create 1.7° of batter to minimize setback and produce a near-vertical wall
- Top wall course can be installed up-side-down so that lugs nest within previous course for quick and easy capping
- Cores line up for easy filling and can accommodate light fencing when combined with additional engineered elements
